

ROLES AND RESPONSIBILITIES

LEAD - DATABASE

REVISION HISTORY

Revision No./Version No.	Date	Prepared by	Approved by	Details of Change
1.0	4-Aug-2023	Rashmi Gondlekar	Anant Sham Yende (CTO)	
2.0	23-Jul-2024	Gayetri Akshay Tirodkar	Prachi Naik (Asst. Manager IT)	Changes in Minimum Experience and Responsibilities

PROFILE DETAILS

DESIGNATION - SE/SD/SSD **DEPARTMENT / VERTICAL** - Software/ Database

REPORTING AUTHORITY - Systems Architect **ROLE** - Lead - Database

MINIMUM QUALIFICATION - M.C.A / B.E / B.Tech /M.E / M.Tech in Computer Science /Computer Engineering/Information Technology

MINIMUM EXPERIENCE - Min 8 Years

JOB OBJECTIVES

- Prudently prepare framed policies, procedures & standards of database structure & queries & Effectively lead a team of database engineers to ensure that efficient and high quality data structure & queries inline with predefined standards policies is designed within the stipulated timeline & with efficient resource utilization.

ROLES AND RESPONSIBILITIES

LEAD - DATABASE

RESPONSIBILITIES

- 1) Understand the database requirements from the TL. during sensitisation meeting, study related documents (proposal, BA system study doc, acts rules etc).
- 2) Assist TL to prepare section related to data-flow diagram of SRS/FRS/Technical Solution Documents.
- 3) Understand the complete system requirement in the kick off meeting through a thorough understanding of the SRS/FRS.
- 4) Designing the database with proper normalization and as per standards and taking its approval from CTO/System Architect in GELJIRA under issue type "Database-Design".
- 5) Prepare a day wise resource wise detailed database plan as per "Project Plan Format" in line with the Tech Lead's timelines & deliverables including database engineer wise day-wise expected deliverable. Brief team thoroughly on the plan.
- 6) Continuously monitor the project & ensure delivery by all team members in a timely manner.
- 7) Ensuring proper database backups are taken and stored.
- 8) Preparing documentations according to CMMI guidelines/Technical Solution Documents such as table link, data flow, system architecture, process flow diagram etc.
- 9) Continuously monitor and identify slow running queries and optimize and fix the same.
- 10) Checking error logs daily and raising the tickets under Issue Type: "Code & DB Exceptions" in GELJIRA and allot the same to the team.
- 11) Conduct following review meetings to monitor health of each project (new & maintenance):
 - a) Stand-up meet: As per "Stand Up Meet SOP".
 - b) Issue resolution meet: As per "Issue Resolution Meet SOP".
 - c) Detail work review meet: As per "Detail Work Review Meet SOP".
 - d) Requirement briefing meet: As per "Requirement Briefing Meet SOP".

ROLES AND RESPONSIBILITIES

LEAD - DATABASE

- 12) Attend following review meetings.
 - a) 11a,11b,11c,11d : As per SOP's with the respective project TL.
- 13) Assign task to the team in GELJIRA/TM & ensure each member logs his/her efforts & work done in GELJIRA.
- 14) On receipt of change request from TL if any, assess the impact of requested change on database by initiating proper impact assessment through RTM, in case of any foreseen delay inform TL & with consultation make subsequent changes in detail work plan & conduct "Requirement Briefing Meet" as per SOP.
- 15) Enumerate and conjoin Innovative Initiatives undertaken/New Technologies adopted/unprecedented ways of implementing certain concepts in Database domain to common repository for knowledge sharing in TM. Record and update best practices, do's and don'ts, standard policy procedure for database domain, get the same signed from System Architect and CTO before publication.
- 16) Do performance grading as per required policy of the associated member of team & suggest improvement/ training required.
- 17) Develop a technology framework for sub verticals for relevant database language such as PostgreSQL, MS SQL, Oracle, MongoDB, MySQL etc.
- 18) Perform skill gap assessment of the database team and prepare training plan to fill the gap of technology deficit in database / training.
- 19) Constantly strive to improve and make the database vertical more stronger.
- 20) Detail rework on Project Plan & work allocation of database coders for new & maintenance project.
- 21) Any other Job/Role/Responsibility at any location given by the management from time to time.

TRAINING REQUIREMENT

Yearly minimum 64 hours of online/in person training in areas as identified by technical team & as per yearly training calendar.
