

STANDARD OPERATING PROCEDURE

Technical Lead(TL) Day Plan

Objective

The following activity schedule for the TL's is designed to help the TL's plan their day & tasks to be carried out by them to ensure efficient time utilization. This is a broad structure & each TL based on their priority may move activities.

Participants

1. Technical Lead: Technical Lead (TL) of the respective vertical e.g development, database, reports etc.

TL Day Plan				
#	Start Time	End Time	Duration hh:mm	Activity
1	9:30 AM	10:00 AM	0:30	Check tasks to be done today, look in
				1. Production issues / backend update /report requests
				2. Development plan tasks list
				3. Testing bugs and decide which engineer to take up the same based on priority and staff availability
2	10:00 AM	10:30 AM	0:30	Conduct Standup meet with the team considering allotted tasks and the project plan & Log the meet in GELJIRA
				Reallocate/ Shuffle tasks of team member(s) based on load. If a member has more tasks, allot few of her/his tasks to member with less no. of tasks in hand.
3	10:30 AM	11:00 AM	0:30	Review project plan/ Resource requirement.
				If additional resources are needed to clear production issues then put a message to CTO with detailed requirement of resource mentioning what tasks and estimation of the same.
4	11:00 AM	12:00 PM	1:00	Conduct issue resolution meets to solve doubts or issues. Have discussion with your team for the task clarity if needed
				Review yesterday code developed by the team.
5	12:00 PM	1:00 PM	1:00	Spare time for yourself to Plan for new requirement/design / change requirement analysis so that you can brief your team correctly.
6	1:00 PM	2:00 PM	1:00	Lunch Break

STANDARD OPERATING PROCEDURE
